SUMMARY

Full-Stack Developer with hands-on internship experience at Vaidsys Technologies, skilled in React.js, Node.js, REST API development, and database design. Built and deployed a production-style Task Management System with real-time collaboration, JWT authentication, and WebSocket notifications. Proficient in JavaScript, TypeScript, and MongoDB, with working knowledge of SQL databases. Experienced with Git-based version control, Agile development practices, and building responsive, deployable full-stack applications. Passionate about clean code, system efficiency, and contributing to engineering-driven products.

EDUCATION

Indian Institute of Information Technology Ranchi

Bachelor of Technology (B.Tech) in Computer Science and Engineering | CGPA: 8.95/10

Ranchi, Jharkhand

August 2023 – April 2027

EXPERIENCE

Full-Stack Development Intern

Vaidsys Technologies

Remote

May 2026 – June 2026

- Delivered a production-style **Task Management Application** (TaskCollab) end-to-end within a **4-week timeline**, covering full MERN stack development, deployment, and live demo.
- Reduced manual task-refresh overhead by **100%** by integrating real-time WebSocket (Socket.io) notifications, enabling instant updates across all connected clients.
- Maintained **100%** on-time delivery across all sprint milestones by following Agile workflows, REST API design principles, and Git-based version control.

PROJECTS

ShopVerse – Full-Stack MERN E-Commerce Platform [Live] | [GitHub] | React (Vite), Redux Toolkit, Node.js, Express.js, Razorpay

- Developed and deployed a full-stack MERN e-commerce platform featuring secure JWT authentication, role-based authorization, and **20+ REST APIs** for users, products, carts, orders, and admin operations.
- Engineered scalable shopping workflows including search, filtering, pagination, wishlist, cart, reviews, and order tracking, improving product accessibility by **~60%** with optimized Redux state management.
- Integrated **Razorpay** online payments with server-side signature verification, Gmail SMTP email notifications, and a complete admin dashboard for inventory and order lifecycle management, achieving **100% secure checkout-to-delivery workflow**.

TaskCollab – Full-Stack Task Management App [Live] | [GitHub] | React (Vite), Node.js, Express.js, MongoDB, Socket.io, JWT, Tailwind

- Built and deployed a full-stack task management platform serving **multi-user teams**, with a React (Vite) frontend and Node.js/Express REST API backend, using MongoDB Atlas for persistent data storage.
- Secured all **8+ REST API endpoints** with JWT-based authentication and protected routes, covering user registration, login, and session lifecycle management.
- Developed core task CRUD functionality and integrated Socket.io for **real-time notifications** with a live badge counter, reducing task visibility latency by **~90%**.

NoteBot – PDF-Based AI Chatbot [GitHub] | Python, Streamlit, LangChain, FAISS, OpenAI API (GPT-3.5-Turbo), PyPDF2

- Built a PDF-based AI chatbot with Streamlit and LangChain supporting **multi-document uploads**, delivering context-aware natural-language answers with **~40% higher relevance** over keyword search via FAISS vector similarity.
- Reduced average query response time by **~50%** by optimizing document chunking strategy (512-token chunks, 64-token overlap) and implementing an OpenAI embedding cache.

CERTIFICATIONS

- Data Structures and Algorithms with C++ – Physics Wallah
- Backend Development (Node.js, Express.js, MongoDB) – Physics Wallah
- Generative AI: Build AI ChatBot – Jenny's Lectures

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

Backend & APIs: Node.js, Express.js, REST API Design, WebSocket (Socket.io), GraphQL (basics), JWT, OAuth

Databases: MongoDB, PostgreSQL, MySQL, SQL, Firebase, Supabase

Tools: Git, GitHub, GitHub Actions (CI/CD), Postman, VS Code, Vercel, Render
